DETAILED ACTION

1. It is called to applicant's attention that if a communication is deposited with the U. S. Postal Service and mailed to the Office by First Class Mail before the reply time has expired, applicant may submit the reply with a "Certificate of Mailing" which merely asserts that the reply is being mailed on a given date. So mailed, before the period for reply has expired, the reply may be considered timely. A suggested format for a certificate follows:

I hereby certify that this correspondence is being deposited with the United States Postal Service as First Class Mail in an envelope addressed to:

Assistant Commissioner for Patents
Washington, D.C. 20231
on _____(date).

Typed or printed name of person signing this certificate

Signature_____

Date_____

2. It would be of great assistance to the Office if all incoming papers pertaining to a filed application carried the following items:

1. Application number (checked for accuracy, including series code and serial no.).
2. Group art unit number (copied from most recent Office communication).
3. Filing date.
4. Name of the examiner who prepared the most recent Office action.
5. Title of invention.

Art Unit: 2632

3. Claims 1-4 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claims are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. Note the format of the claims in the patent(s) cited.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, as far as definite, are rejected under 35 U.S.C. 102(b) as being anticipated by Poumey (U.S. Patent No. 5,195,253).

Regarding claim 1, Poumey discloses a manual cordless hairdryer comprising a demountable cordless hairdryer 3 provided with a rechargeable battery 17, a cordless charger 1, a multiple speed control switch 18 joined to a motor 13 that turns a fan 14 to blow air, the rechargeable battery sandwiched in a handset including a metal contact (-) that can be used to hold the battery (see figures 1-4).

Regarding claim 2, Poumey discloses said cordless charger 1 with a plug 2.

Art Unit: 2632

Regarding claim 3, Poumey discloses said manual cordless hairdryer mounted to a portable cordless charger 1 serving as a holder base with a LED 20.

Regarding claim 4, Poumey discloses the charger, the handset being made out of plastic materials (column 3, lines 58-68).

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Karey, Levin, Hafey, and Bourdeau disclose manual cordless hairdryers.
